## NATURAL HOT SPRING WATER

BANJAR DISTRICT,  
BULELENG REGENCY

- There are three bathing pool areas here where you can swim in 38-degree Celsius of sulfuric water. The top area is the hottest, with spring water coming out of the "dragons mouth", which then overflows to the second bath located in the lower pond with slightly cooler waters. The last pool has water falling from about three meters high, here the cascading waters make for a wonderful, natural back massage. It's easy to find, with clear signposts to the hot spring visible from the main road of Banjar Village. Keep an eye out for the words "Permandian Air Panas", or hot spring baths. Before the entrance, you'll notice an abundance of shopkeepers trying to sell you handicrafts, souvenirs, shirts, etc.
